

Custom Test Sockets and Fixtures for FA and Production

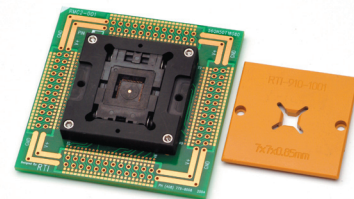

Failure Analysis & Characterization Sockets

- Very low profile—open top sockets for QFN, CSP, μ BGA, LGA, MLF, MLP, PLCC, LCC, and most others, 0.4mm pitch and larger
- Micro-probing / liquid crystal / emission microscopy / backside test, etc.
- Heated sockets / very low inductance / high spring force for lead-free / RF / custom lids

Engineering & Production Sockets

- RTI's specialty is sockets for non-standard IC packages and hybrids
- MCM / optical packages / medical devices / 35mm film / dualsided packages / RF

Custom Test Fixtures & Interfaces

- Interface / DUT / Performance Board
- Daughter Card-Mother Board Designs
- Curve tracing / Microprobing / Back side test
- Switch-boxes / Break-out boxes
- Innovative custom interface solutions
