

Need a custom socket, DUT board, or Test Fixture ...?

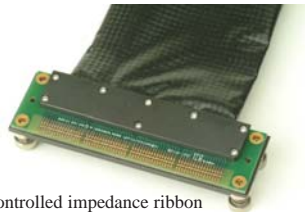

We've done all that and more!

From 0.4mm pitch QFNs to 2000 pin BGAs, from fixtures for hybrids going to outer-space to sockets for implant devices, from fixtures for 1mm square devices to ceramic hybrids, multi-chip modules and small PCBs: We've built these and much, much more! We can truly say, "Been there, done that!"

Come see what RTI can build for you!

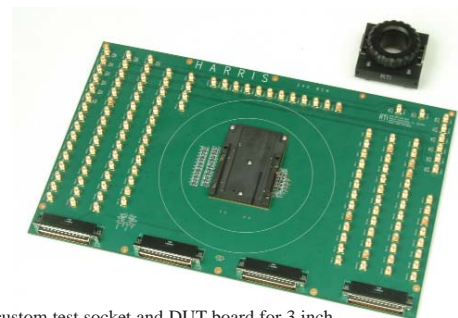

Probe station fixtures for packaged and wafer level analysis

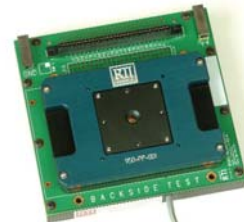

Controlled impedance ribbon cable with pogo pin interface

Engineering and production test sockets

Full custom test socket and DUT board for 3 inch hybrid with 400 test pins on 0.8mm pitch

FA heated backside test fixture for QFN type packages
