

Need a custom socket for a non-standard package, a hybrid, a small PCB... We've got what you need!

From sockets for 4 lead μ BGAs to 2000 pin BGAs. From sockets for hybrids going to outer-space to sockets for human implant devices. From FA backside test sockets to microwave production sockets. From sockets for 1 mm square devices to ceramic hybrids over 10 inches long. We've built all that and much, much more! We can truly say, "Been there, done that!"

Come see what RTI can build for you!

μ BGA Burn In Socket

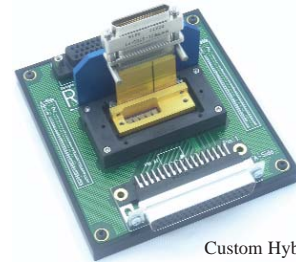

Quad-Site for Strip Testing

Small PCB with 20 Kelvin Probes

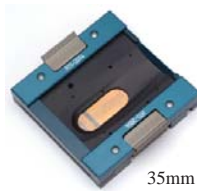

Socket for a 10 inch long Ceramic Hybrid

Custom Hybrid with 0.5 mm Pitch and Flex Circuit

CLCC Imaging

35mm Film
